a.- for b.- while c.- ago d.- during
 - 5- She put _____ sugar in her coffee.
a.-little b.- few c.- many d.- several

II- Compétence Interprétative (40%)

- A- Read the text carefully then answer the questions below. (15%)
Climate migrants

As the climate crisis gets worse, millions of people are being displaced – forced to leave their homes – due to environmental problems. These people, often called climate migrants or climate refugees, face serious challenges. Climate change is causing many areas to become less safe or less able to support life. Some people abandon their homes because of sudden disasters like floods, droughts, hurricanes, or wildfires. Others must move because of slower changes like rising sea levels, which threaten entire islands and coastal cities, or because droughts make it hard to grow food.

One of the biggest problems for climate migrants is that they do not have legal status under international law. Current laws, such as the 1951 Refugee Convention, protect people who are fleeing their countries due to war, persecution, or violence. However, these laws do not include climate change as a reason for seeking refuge; therefore, climate migrants do not receive the same protections or access to help as refugees.

As natural disasters continue to displace millions of people, there is an urgent need for new legal protections for climate migrants. There are ongoing discussions at the United Nations about creating new legal frameworks to protect climate-displaced people, but they are taking a long time to move forward. At the same time, the world must work together to reduce the effects of climate change and help vulnerable communities adapt.

- C- Rewrite the sentences as indicated in parentheses. (10%)
- 1- I was feeling ill. I went to work. (Combine the two sentences using: in spite of)
 - 2- She slipped on the wet floor and fell hard, (Write the negative form of the sentence)
 - 3- This is George's brother. I went to school with George's brother yesterday. (Use a relative clause).
 - 4- 4. There was a fire extinguisher. The house didn't burn down. (Use If +past perfect)
 - 5- They draw a map to show us the way to the cabin. (Turn into passive voice)

- D- Complete the text with the correct word. (10%)
cybersecurity – artificial – virus – data – robots – innovation

Modern technology is changing our lives in many ways. In factories, (1) _____ are used to build products more efficiently. Many companies now use (2) _____ intelligence to analyze large amounts of (3) _____. These changes are examples of rapid (4) _____ in the tech world. However, as we depend more on digital tools, (5) _____ becomes more important to protect personal information.

1. Give two main types of climate events that cause people to migrate.
2. Say why climate migrants are not protected by current refugee laws.
3. What might happen if the world does not act to protect climate migrants?

B.- Governments should focus more on preventing climate migration instead of helping people after they move. State your point of view about this statement using strong supportive arguments. (10%)

C.-Based on the indicated paragraph, find in the text: (15%)

- 1.-An opposite of **unlawful** in paragraph 2.
- 2.- A word that refers to “**long periods without rainfall**” in paragraph 1.
3. A synonym of **impacts** in paragraph 3.

III- Compétence Discursive et Argumentative (20 %)

A- Problem-solving situation (10%)

Explain how you would react to the following situation in one or two lines.

You're working on a group project, but one of your team members is not doing any work.

B) Choose a or b. (10%)

a. Reorder the following sentences to form a coherent paragraph about a scientific study.

- They divided the plants into two groups: one received eight hours of direct sunlight daily, while the other received only four hours.
- Measurements taken weekly showed that the plants with more sunlight exposure had a 30% increase in height and produced more fruit.
- These findings could provide valuable insights for agricultural practices, especially in regions with limited natural light.
- The study concluded that increased sunlight significantly enhances the growth and fruit production of tomato plants.
- Researchers at the University of Atlanta conducted a six-week study to explore the effects of varying sunlight exposure on the growth of tomato plants

b. Do you think healthcare should be free for everyone? State your point of view in a ten-line paragraph.
